Java SE & EE	javascript	MySQL	TeamCity	Docker
Spring Framework	PHP	MongoDB	Jenkins	Linux
Kotlin	Vue.js	Redis	GCP	Nginx

WORK EXPERIENCE

Gluo - Technical Lead, Sr. Developer

PRESENT

MAY 2017

- Guided by an agile methodology we are doing the best to develop and delivery good functionalities through DevOps practices.
- Analyze, coordinate and propose ideas to develop fast new features and avoid re work and possible future bad functionality.
- Mainly in the application we use java, microservices architecture, spring framework, MySQL, mongoDB, kotlin, apache camel, neo4j, vue.js, javascript, jQuery and others.
- Development of new features with coworkers, helping them to solve and finding the best way to do it in base of best practices.
- Coordinate CI / CD in quality and production environment using tools like Team City, Jenkins, SonarQube, Junit, Mockito, SoapUI and configuring nginx.
- Develop and coordinate a project using PHP for the backend and Vue.js for the frontend, it functions over GCP using modules as GAE, GCE, GCS and Cloud Functions.

Grupo Proyectos - Sr. Developer, Mid. Developer

MAY 2017

NOV 2013

- Analyzed and developed new requirements in collaboration with other developer.
- Together did the best to develop good functionalities and features that the company needs, the application was coded in Java using Servlets, JSP, jQuery, CSS, JDBC, SQL Server.
- I was in charge of maintenance of Windows Server and MS SQL Server in production environment.
- We created a new application to improve management, prospect tracking and grant of new personal credits and car credits.

Independent contractor – Web developer

JUL 2017

FEB 2017

- Worked as a freelance developer building an application to management information about patients in a clinic.
- We used mainly CSS, Bootstrap, jQuery, Spring MVC, MySQL, Apache Tomcat.
